Title: International Workshop on Intelligent Communication (IWIC 2024)

Summary: Intelligent communication refers to the use of advanced technologies and artificial intelligence to enhance and improve the way we communicate with each other and with devices. It involves the use of intelligent systems that can understand, interpret, and respond to human language, behaviour, and emotions in real-time. The International Workshop on Intelligent Communication (IWSC 2024) aims to bring together researchers, practitioners, and industry experts to share their latest research and innovations in the field of intelligent communication. The workshop seeks to explore the advances and applications of AI-powered communication tools and technologies, and their impact on personal and professional communication and collaboration.

Topics of Interest:

We welcome paper submissions on a wide range of topics related to intelligent communication, including but not limited to:

- AI-powered communication tools and technologies
- The design and use of Generative AI for content creation
- Virtual and augmented realities in communication
- Personalised communication and recommendation systems
- Ethics and privacy issues in intelligent communication
- Digital wellbeing and its impact on communication
- Intelligent communication case studies and applications
- Human machine communication and interaction
- Human centred design for digital native and digital immigrants

Chairs:

Nan Jiang, Bournemouth University, UK.

Wei Meng, Communication University of China, China.
